

Maxihook 20

Adjustable wall hanger for heavy loads

100 kg per hook

The Maxihook 20 is a professional product designed by Chassitech™ for hanging heavy paintings on walls. The Maxihook product range is one of Chassitech's key products and it can be found in many museums both world wide.

Maxihook 20s are made from tempered and anodised aluminium profiles and drilled so that they can be fastened on the wall. They are usually placed on either side of the paintings but can also be placed at the bottom. In any case, the device is invisible from the front and very discreet from the side.

The Maxihook mobile hook can be used with all types of hangers: eye bolts, D-rings, chains... up to a diameter of 7mm. A screw at the bottom allows the height of the hook to be changed with great precision **without removing the painting**.

Special interchangeable projection hooks are available (for projecting stretchers, back protections, climate crates etc.).

All hooks can be fitted with anti-theft devices (optional).

Features

2 models are available. They vary in length and in the number of holes for wall fixtures.

Other lengths (up to 3 m), finishes (anodised satin silver) and types of fixing holes available on request.

- Maxihook 20 with 2 holes (photo above), dimensions: 80 × 20 × 10 mm.
- Maxihook 20L with 3 holes, dimensions: 110 x 20 x 10 mm ; for drywalls and fragile walls, an anchor can be added. The Maxihook 20 has been laboratory tested. It is recommended for an individual load of 100kg* in normal use. A pair of Maxihooks can therefore hang a painting weighing 200kg*.

Wall screws: the Maxihook 20 is supplied with 5x 45 mm wood screws and accepts fixing screws up to 6 mm in diameter.

*** The indicated load values assume that the wall anchors used have at least the same load capacity.**

The standard hook allows any ring, piton or chain up to 7 mm in diameter. The height adjustment of the hook is up to 20 mm as standard (other custom-made strokes are possible). The picture on the left shows the hook in the upper position with a D-ring.

2 body sizes available:

- Maxihook 20: 80 mm
- Maxihook 20L: 110 mm

Accessories

- Special extra-long screwdriver for adjusting screws
